Detailed profile of the company and its three service categories

Version 1.0 | October 2026

1. Executive Summary

Rolkat Financial Services SMC Ltd is a Ugandan company that operates in three connected lines of business: **financial services (lending)**, **property management** and **real estate**. Its brand promise is "**Serving you better**". The company is based at Hanora Plaza in Zana, along Entebbe Road, opposite Be Energies.

Rolkat's lending is aimed at ordinary working people and small enterprises: boda boda cyclists, small retailers and market vendors. It offers micro loans, small business loans, group loans, emergency loans and market vendor loans, with daily or weekly repayment, flexible payment terms and a 24-hour approval promise.

This profile describes the company, the market it serves, and each of its three service categories in detail: what the service is, who it is for, how it is delivered, how risk and compliance are managed, and how performance can be measured.

1.1 Company snapshot

Item	Detail	Status
Registered name	Rolkat Financial Services SMC Ltd	Confirmed
Business form	Single Member Company (SMC), limited liability	Confirmed
Brand tagline	Serving you better	Confirmed
Service categories	Financial services, property management, real estate	Confirmed
Office	Hanora Plaza, Zana, Entebbe Road, opposite Be Energies	Confirmed
Phone / WhatsApp	+256 787 165 366	Confirmed
Email	katongolejames122@gmail.com	Confirmed
Core customers	Boda boda cyclists, small retailers, market vendors, groups, small businesses	Confirmed
Date of incorporation, registration number, licence numbers	Not yet supplied	To confirm

1.2 How to read this profile

Information in this document comes from three places, and each is labelled so nothing is mistaken for fact:

- **Confirmed:** taken from Rolkat's business card and the owner's brief (service lines, loan types, target groups, repayment options, contact details).
- **Proposed:** recommended standards, processes and targets based on good practice and Ugandan law. Rolkat should adopt, adjust or reject each one.
- **To confirm:** facts only management can supply, such as loan sizes, rates, fees and licence numbers.

Where this profile shows a figure for interest, fees or timing, it is an illustration or a proposed standard, not a statement of Rolkat's current prices.

2. Company Overview

2.1 Identity and positioning

Rolkat positions itself as a practical, approachable financial services provider for people who are often underserved by traditional banks: daily earners and small traders who need quick, small and flexible credit. Alongside lending, it offers two property services, which lets it serve both people who need money and people who own or want property.

The name and logo (an orange-red circular "R" with navy lettering) give the brand a confident, trustworthy look. The tagline "Serving you better" sets a service-first promise that every part of the business should be able to prove in practice: speed, clarity, fairness and respect.

2.2 Legal form

An SMC is a company with a single member (owner). It has its own legal identity and limited liability, so the company's debts are separate from the owner's personal assets. This form suits a growing business that wants to be formally registered and credible with customers, regulators and partners.

2.3 Location

The office in Zana sits on the Entebbe Road corridor, a busy route linking Kampala and Entebbe with heavy traffic of commuters, boda boda riders, shops and markets. This is a strong location for a business whose lending is aimed at transport workers and small traders, and whose property services can draw on the area's residential and commercial growth.

2.4 Vision, mission and values (Proposed)

Element	Proposed statement
Vision	To be the most trusted provider of financial, property and real estate services for everyday Ugandans and small businesses.
Mission	To serve customers better by giving fast, fair and flexible access to credit, and professional management and advice on property.
Values	Speed, honesty and transparency, fairness, respect for the customer, discipline, and accountability.

2.5 Business model at a glance

Line	How it earns	Main customer
Financial services	Interest and fees on loans (within legal limits)	Individuals, groups and small businesses
Property management	Management fees for looking after owners' property	Property owners and landlords
Real estate	Commission or service fees on sales, rentals and land deals	Buyers, sellers, landlords and tenants

3. Market Context

3.1 Why small, flexible credit matters in Uganda

A large part of Uganda's workforce earns income daily or weekly from informal work such as transport, trading and market selling. Banks often find these customers hard to serve because their incomes are irregular, their records are informal and they need small amounts quickly. Tier 4 lenders, including licensed money lenders, fill this gap.

Published figures show how large the segment is:

- By September 2023, 1,302 licensed money lenders had lent to about 2.5 million customers, with an outstanding portfolio of about UGX 1.2 trillion (UMRA figures reported by the Money Lenders Association of Uganda).
- At least 52 percent of adult Ugandans borrowed money in the five years to 2023 (reported by Daily Monitor).
- By the end of 2023, UMRA had licensed 1,802 Tier 4 institutions in total (Daily Monitor).

3.2 Regulation shapes the opportunity

Lending is now tightly regulated. Money lenders must be licensed by the Uganda Microfinance Regulatory Authority (UMRA), and since November 2024 the maximum interest a money lender may charge is **2.8% per month (33.6% per year)**. This rewards lenders who operate transparently and efficiently, and removes room for the exorbitant rates that damaged the industry's reputation.

3.3 Property and housing demand

Uganda's urban areas continue to grow, and the Entebbe Road corridor combines housing, commercial premises and land. Demand for rental housing, trusted agents and professional management is steady. The Landlord and Tenant Act, 2022 (in force since 17 June 2022) now sets clear rules for tenancies, which raises the value of agents and managers who know and apply the law.

3.4 Competition

Competitor type	Strengths	Weakness Rolkat can address
Commercial banks	Low rates, large capital	Slow, documentation-heavy, avoid small informal borrowers
Mobile money loans	Instant, convenient	Very small amounts, limited relationship
SACCOs and village groups	Trust, community	Limited capital, slower access
Other money lenders	Speed, local presence	Some lack licences, transparency or fair collection practice
Informal property brokers	Local contacts	No formal contracts, little accountability

4. Service Category One: Financial Services

4.1 Overview

What it is (Confirmed): Rolkat provides loans to individuals, groups and small businesses. Loans are offered as micro loans, small business loans, group loans, emergency loans and market vendor loans, repaid daily or weekly on flexible terms, with approval promised within 24 hours.

Purpose: To give working people fast, simple credit so they can stock goods, handle emergencies, grow a business or keep earning, without the delays of a bank.

Customer promise (Confirmed): "Get a quick loan." Fast approval, flexible payments, and respectful service.

4.2 Loan product catalogue

Product 1: Micro loans

Attribute	Detail
Purpose	Small amounts for immediate personal or business needs, such as stock top-up, tools, school costs or household needs
Typical borrower	Boda boda cyclists, small traders, casual earners
Repayment	Daily or weekly (Confirmed)
Proposed approach	Start with a small first loan, then raise limits for good repayment. Reward punctual borrowers with larger loans over time
To confirm	Minimum and maximum amount, tenure, interest rate, fees

Product 2: Small business loans

Attribute	Detail
Purpose	Working capital or modest expansion: stock, equipment, stall or shop improvements
Typical borrower	Small retailers and established small enterprises
Repayment	Weekly or flexible schedule agreed with the borrower (Confirmed: flexible terms)
Proposed approach	Assess actual sales and cash flow rather than only documents. Visit the business before approving
To confirm	Amount range, tenure, security requirements, rate and fees

Product 3: Group loans

Attribute	Detail
Purpose	Lending to a group whose members support one another to repay
Typical borrower	Groups of traders, boda boda riders, women's or community groups
Repayment	Usually weekly, collected at the group level
Proposed approach	Group of an agreed size, members know and vouch for each other, shared responsibility, individual loan amounts recorded for each member
To confirm	Group size, guarantee rules, meeting schedule, rate and fees

Product 4: Emergency loans

Attribute	Detail
Purpose	Urgent expenses that cannot wait, such as medical bills, a motorcycle repair or a stock emergency
Typical borrower	Existing customers and approved new borrowers
Repayment	Short term, daily or weekly
Proposed approach	Fastest decision path, ideally same day for returning customers with good history. Keep amounts modest to limit risk
To confirm	Maximum amount, tenure, pricing, eligibility for first-time borrowers

Product 5: Market vendor loans

Attribute	Detail
Purpose	Daily working capital for vendors who buy fresh goods in the morning and sell by evening
Typical borrower	Market vendors, stall holders, small food sellers
Repayment	Daily repayment suits the vendor's daily cash cycle (Confirmed: daily loans offered)
Proposed approach	Collect small daily amounts, ideally close to the vendor's workplace, with a clear repayment record book
To confirm	Loan sizes, tenure, collection method

4.3 Target customer segments (Confirmed segments, Proposed analysis)

Boda boda cyclists

- **Situation:** Earn daily, often renting or buying on instalments, with high daily fuel and maintenance costs.
- **Needs:** Quick cash for repairs, fuel, licence fees, insurance and personal emergencies.
- **Best-fit products:** Micro loans, emergency loans, daily or weekly repayment.
- **Risks:** Accidents, bike theft, police impounding and seasonal income dips. Mitigate with small starting loans, rider registration (stage, stage chairman reference) and gradual limit increases.

Small retailers

- **Situation:** Run shops, kiosks and stalls with thin margins and a constant need to restock.
- **Needs:** Working capital to buy stock in bulk and avoid stock-outs.
- **Best-fit products:** Small business loans, weekly repayment.
- **Risks:** Slow-moving stock and customer credit. Mitigate with shop visits, stock checks and cash-flow assessment.

Market vendors

- **Situation:** Buy and sell on the same day with income arriving in small amounts.
- **Needs:** Daily capital and a repayment pattern that follows daily sales.
- **Best-fit products:** Market vendor loans, daily repayment.
- **Risks:** Perishable goods, weather and market closures. Mitigate with small tickets and daily collection discipline.

4.4 Repayment structure (Confirmed options, Proposed rules)

Option	How it works	Best for
Daily loans	Small fixed amount paid each working day	Market vendors, boda boda riders
Weekly loans	One fixed payment each week	Small retailers, groups, riders with stable weekly income
Flexible payment terms	Schedule agreed to match the borrower's real income pattern	Borrowers with irregular income, with approval from management

Proposed repayment rules: a written schedule given to every borrower, a receipt for every payment, a clear and fair grace practice for a missed payment, and a written policy for early repayment.

Illustration of the legal pricing ceiling (not Rolkat's rates)

This worked example shows the maximum a money lender may charge under the 2.8% per month ceiling, applied to the amount lent. It is only to help staff and customers understand the numbers.

Item	Amount
Loan principal	UGX 1,000,000
Maximum interest at 2.8% per month, 3 months	UGX 84,000
Total to repay	UGX 1,084,000
If paid weekly over 13 weeks	About UGX 83,385 per week
If paid daily over 78 working days (6 days a week)	About UGX 13,897 per day

Rolkat must confirm its actual rates, which must not exceed the ceiling, and must show borrowers the total cost in shillings before they sign.

4.5 The loan journey (Proposed process)

Stage	What happens	Proposed standard
1. Enquiry	Customer calls, messages on WhatsApp or visits Hanora Plaza	Reply the same day. Explain products clearly
2. Application	Customer states purpose, amount and repayment plan. Staff record details	Simple application form, in English or Luganda
3. Identity and KYC	Verify national ID, phone number, residence or business location and a referee	Copy of ID, passport photo, contact of a referee or group leader
4. Assessment	Check income, cash flow, character and any existing debts	Visit the business or workplace where practical
5. Decision	Approve, adjust or decline with reasons	Within 24 hours of a complete application (Confirmed promise)
6. Agreement	Written loan agreement in clear language, showing amount, total cost, schedule and consequences of default	Borrower signs and receives a copy
7. Disbursement	Funds released by mobile money, bank or cash	Record the transaction and issue acknowledgement
8. Repayment	Borrower pays daily or weekly	Receipt every time. Update the customer record the same day
9. Follow-up	Reminders before due dates and a courteous call after a missed payment	Respectful, no harassment
10. Closure and renewal	Final receipt, clearance note, and invitation to a larger loan if the record is good	Reward good payers with higher limits and better service

4.6 Credit assessment and risk management (Proposed)

Assessment framework: staff should judge each applicant on character (reputation, references), capacity (cash flow versus repayment), stability (time in the same place or trade), and purpose (what the money will be used for).

Risk controls:

- Start new customers with small loans and raise amounts step by step.
- Use group guarantees and local references where individual security is absent.
- Keep an agreed limit on how much any single borrower or segment can take.
- Keep a daily record of collections and a weekly review of late accounts.
- Track the share of the portfolio that is overdue (portfolio at risk) and act early on slipping accounts.
- Keep enough cash reserve to fund new loans and cover bad debts.
- Separate duties: the person who approves a loan should not also be the only person who handles the cash.

Collections ethics: follow up politely, in private, and within lawful hours. Never threaten, shame or take property without lawful process.

4.7 Regulation and compliance

Requirement	What it means for Rolkat	Status
UMRA licence	Under the Tier 4 Microfinance Institutions and Money Lenders Act, a money lender must be a registered company and hold a money lending licence from the Uganda Microfinance Regulatory Authority	To confirm: licence number and expiry
Company registration	Registration with the Uganda Registration Services Bureau under the Companies Act, 2012	To confirm: certificate
Interest ceiling	Money lenders may not charge more than 2.8% per month (33.6% per year). Charging more is an offence: fine of up to UGX 1,000,000, possible cancellation of the licence, and refund of the excess to the borrower	Must comply
Unlicensed lending	A High Court ruling has barred unlicensed money lenders from charging interest, so a valid licence protects the business's right to recover interest	Must comply
Data protection	Customer personal data must be collected, stored and used in line with the Data Protection and Privacy Act, 2019	Proposed: privacy notice and secure records
Anti-money-laundering	Know-your-customer checks and record keeping, and reporting of suspicious transactions as the law requires	Proposed: written KYC procedure
Tax	Business registration with the Uganda Revenue Authority and timely filing	To confirm

Rolkat should confirm all legal requirements with a qualified Ugandan lawyer or directly with UMRA, because rules and ceilings can change.

4.8 Responsible lending and customer protection (Proposed)

- **Transparency:** show the total amount to repay, the schedule and all fees in writing before signing.
- **Affordability:** lend only what a borrower can reasonably repay from income.
- **Fair treatment:** same standards for all customers, no pressure to borrow more.
- **Complaints:** a visible complaints process with a named contact and a response time.
- **Privacy:** never share customer details without consent or legal duty.
- **Financial education:** short guidance on budgeting, saving and using credit wisely, which also improves repayment.

4.9 Performance measures (Proposed)

Measure	Why it matters	Suggested target
Time to decision	Tests the 24-hour promise	90% or more within 24 hours
Portfolio at risk (30 days)	Quality of the loan book	Below 5-8%
Repayment rate	Collection discipline	95% or higher
Repeat borrower rate	Customer satisfaction	Rising each quarter
Active borrowers	Growth	Set quarterly goal
Complaints resolved on time	Service quality	100% within the stated period

4.10 Strengths, challenges and opportunities

Strengths	Challenges
Clear target market and simple, understandable products	Rate ceiling squeezes margins, so efficiency is vital
Fast-approval promise and flexible repayment	Informal borrowers have limited records, so risk is higher
Convenient location on a busy corridor	Competition from mobile money and other lenders
Three service lines that build customer relationships	Need for licences, systems and trained staff

Opportunities: mobile money collection and disbursement, a customer record system, partnerships with boda boda stages and markets, group lending drives, and cross-referral to property services.

5. Service Category Two: Property Management

5.1 Overview

What it is (Confirmed): Rolkat offers property management as one of its three service lines. In this role Rolkat acts as the owner's agent: finding and screening tenants, collecting rent, maintaining the premises and reporting to the owner.

Purpose: To protect the owner's investment and income, keep tenants satisfied, and take the daily burden off owners, especially those who live away, work full-time or own several units.

Who it serves: Individual landlords, owners of rental flats and commercial premises, diaspora owners, and owners of vacant property who want it looked after.

5.2 Scope of services (Proposed service menu)

Service area	What Rolkat does
Property onboarding	Inspect the property, record its condition with photographs, collect ownership documents, agree the management terms in writing
Marketing and letting	Set a fair rent, advertise vacancies, show the property, and handle enquiries
Tenant screening	Verify national ID (required before a tenancy under the Landlord and Tenant Act, 2022), check references and income, and select suitable tenants
Tenancy agreements	Prepare a written agreement, have it signed, and make sure the tenant receives a copy straight away as the Act requires
Rent collection	Collect rent on the due date, issue receipts, follow up on arrears and remit to the owner
Maintenance and repairs	Receive tenant requests, arrange vetted contractors, get approval for larger costs, and keep records
Inspections	Routine inspections with notice and a written condition report
Utilities and compliance	Track utility accounts, taxes and rates the landlord must pay, and keep the property compliant
Financial reporting	Monthly statement showing rent collected, expenses and net amount paid to the owner
Tenant relations	Handle complaints, communicate notices, and keep a professional, respectful relationship
Move-out	Notice handling, final inspection, deposit and deductions settlement, and re-letting
Security and caretaking	Coordinate caretakers and basic security for the premises

5.3 Property types (Proposed)

- Residential rental units: single houses, flats and rooms.
- Commercial premises: shops, offices and arcade units.
- Mixed-use buildings.
- Vacant properties and plots needing oversight.

5.4 Owner onboarding process (Proposed)

Step	Action
1	Introductory meeting and property visit
2	Agree scope, fee and reporting in a written management agreement
3	Collect documents: proof of ownership, owner ID, existing tenancy agreements, utility details
4	Condition inspection and photographic record
5	Set rent, prepare marketing and start screening tenants
6	Hand over a monthly reporting calendar to the owner

5.5 Day-to-day delivery

Rent collection cycle

1. Send a reminder before the due date.
2. Receive payment by mobile money, bank or cash, and issue a receipt the same day.
3. Record the payment on the tenant ledger.
4. Follow up politely on late payments the next day, then escalate in writing.
5. Remit the owner's share, less agreed fees and approved costs, on a fixed date each month.

Maintenance handling

Priority	Example	Proposed response
Emergency	Burst pipe, electrical danger, security breach	Same day
Urgent	No water or power, broken lock	Within 48 hours
Routine	Painting, minor repairs, cosmetic issues	Within 7 to 14 days
Planned	Roof, wiring, major refurbishment	Quoted, owner-approved and scheduled

Always get at least two quotes for larger repairs, and agree a spending limit with each owner above which approval is required.

5.6 Legal framework: Landlord and Tenant Act, 2022

The Act came into force on 17 June 2022 and regulates the relationship between landlords and tenants. Key points a property manager must apply:

- The landlord must obtain identification from the tenant before a tenancy begins.
- The landlord must give the tenant a copy of the tenancy agreement immediately after signing.
- Unless both sides agree otherwise, the maximum rent a tenant may be asked to pay in advance is three months.
- The landlord is responsible for taxes and rates on the premises, and must keep the premises in good repair.
- The landlord must ensure the tenant's quiet enjoyment and may enter the premises only as the Act permits.
- The Act allows a landlord and tenant to act through an agent, which is the legal basis for Rolkat's role.

- Termination must follow the Act, and unlawful eviction is prohibited.

The Act repealed the earlier Rent Restrictions Act. Rolkat should keep a copy of the current Act, confirm any implementing regulations, and have agreements checked by a lawyer.

5.7 Management fees (To confirm)

Property managers commonly charge a percentage of rent collected, sometimes with a separate letting fee when they find a new tenant. Rolkat should set and publish its own fee structure and state clearly in the management agreement what is included and what is charged extra.

5.8 Risks and controls (Proposed)

Risk	Control
Rent arrears	Strict screening, clear due dates, early reminders, written escalation
Property damage	Condition report at move-in and move-out, regular inspections
Disputes with tenants	Written agreements, calm communication, follow the Act
Misuse of owner's money	Separate records for each owner, monthly statements, and where possible a dedicated account for collected rent
Poor contractor work	Vetted contractor list, quotes, inspection before payment
Vacancy	Prompt marketing, realistic rent, good tenant retention

5.9 Performance measures (Proposed)

Measure	Suggested target
Occupancy rate	90% or higher
Rent collected on time	90% or higher
Average days to re-let a vacancy	Under 30 days
Maintenance requests closed within target	90% or higher
Owner statements delivered on schedule	100%
Owner and tenant satisfaction	Reviewed every six months

6. Service Category Three: Real Estate

6.1 Overview

What it is (Confirmed): Rolkat offers real estate as its third service line. This covers helping customers buy, sell and rent property, and advising them through each step.

Purpose: To connect buyers, sellers, landlords and tenants safely, and protect customers from the fraud and disputes that can accompany property deals in the market.

Who it serves: First-time home buyers, plot buyers, investors, sellers, landlords with vacancies, and tenants looking for a home or business premises.

6.2 Scope of services (Proposed service menu)

Service	What Rolkat does
Property sales	List properties, market them, show buyers, negotiate and guide the sale to completion
Land sales	Help sellers present land with correct documents, and help buyers find suitable plots
Rentals and leasing	Find tenants for landlords and homes or premises for tenants, and prepare tenancy agreements
Buyer representation	Understand the buyer's needs and budget, shortlist options and attend viewings
Seller representation	Advise on a realistic price, prepare the listing and manage enquiries
Due diligence support	Guide customers through ownership and legal checks before they pay
Valuation referral	Refer customers to a qualified valuer for a professional valuation
Advisory	Explain the process, costs and risks of buying or selling in plain language
Referrals	Introduce customers to trusted lawyers, surveyors and valuers

6.3 Property categories (Proposed)

- Residential land and plots
- Houses and apartments for sale
- Rental houses and flats
- Commercial shops, offices and warehouses
- Investment land and development plots

6.4 The buyer's journey (Proposed)

Stage	Action	Rolkat's role
1. Needs and budget	Define location, size, budget and purpose	Advise and shortlist
2. Search and viewing	Visit matching properties	Arrange and accompany viewings
3. Due diligence	Verify ownership and encumbrances	Guide checks, involve a lawyer and surveyor
4. Negotiation	Agree price and terms	Negotiate fairly for the client
5. Sale agreement	Written agreement and payment terms	Ensure terms are in writing and witnessed
6. Payment	Pay by traceable means, with receipts	Insist on documented payments
7. Transfer	Sign transfer forms, pay duties, register the title	Coordinate with the lawyer until the title is in the buyer's name
8. Handover	Take possession	Final inspection and handover

6.5 The seller's journey (Proposed)

Stage	Action
1. Appraisal	Visit the property and advise on a realistic price range
2. Documents	Gather title, survey and identification documents
3. Listing	Prepare photos, a clear description and location details
4. Marketing	Advertise through WhatsApp, social media, signage and the agent network
5. Viewings and enquiries	Qualify buyers and arrange viewings
6. Negotiation and agreement	Handle offers and prepare the sale agreement
7. Completion	Support the transfer and confirm full payment

6.6 Understanding land in Uganda

Uganda's land law recognises several forms of ownership, and an agent must know which one applies to any property before advising a customer.

Tenure	Brief description
Freehold	Ownership for an indefinite period, subject to the law
Mailo	Ownership of land registered under the historical mailo system, often with tenants (bonafide or lawful occupants) on the land
Leasehold	Right to use land for a fixed period under a lease, from a government or private owner
Customary	Land held under local customs, which may or may not have a certificate of customary ownership

6.7 Due diligence checklist (Proposed)

Customers should never pay in full before these checks are done:

1. Confirm the seller's identity and that the seller is the registered owner.
2. Carry out an official search of the title at the land registry.
3. Check for mortgages, caveats, court orders and other encumbrances.
4. Confirm the tenure type, and for leasehold, how many years remain.
5. Where the land is family land or occupied by a spouse or others, confirm the required consents.
6. Check that occupants or tenants on the land (for example under mailo) are identified and their rights understood.
7. Have a surveyor confirm boundaries and acreage on the ground.
8. Check planning and zoning permissions for the intended use.
9. Pay through the bank or traceable mobile money, and get receipts.
10. Use a qualified lawyer for the sale agreement and transfer.

6.8 Fees (To confirm)

Agents typically earn a negotiated commission or service fee when a sale or rental completes. Rolkat should agree its fee with each client in writing before work starts, and state who pays, when it is due and what happens if the deal does not complete.

6.9 Risks and controls (Proposed)

Risk	Control
Fake or disputed titles	Mandatory registry search and lawyer review
Double selling	Written, witnessed agreements and documented payments
Fraud by impersonation	Verify identity of every seller in person
Misleading listings	Photograph and visit every property before advertising it
Reputation damage from a bad deal	Decline listings that cannot be verified

6.10 Performance measures (Proposed)

Measure	Suggested use
Active listings	Inventory strength
Enquiries per listing	Marketing effectiveness
Viewings to offers ratio	Sales effectiveness
Deals completed per quarter	Core performance
Average days on market	Pricing realism
Customer referrals	Trust measure

7. How the Three Services Work Together (Proposed)

Rolkat's strength is that each service line brings customers to the others, while each stays financially separate.

Link	Opportunity
Property management to real estate	Landlords who manage through Rolkat will often sell or buy through Rolkat
Real estate to property management	New property owners need someone to let and look after their property
Lending to all lines	Loan customers who become property owners or landlords can be introduced to the property services
Brand	One trusted name, one phone number, one office for all three

Control to keep: customer money from lending, owners' rent and property deposits must be recorded separately and never mixed. Each line should have its own records and accounts.

8. Operating Model and Organisation

8.1 Channels

- Walk-in at Hanora Plaza, Zana
- Phone and WhatsApp on +256 787 165 366
- Email at katongolejames122@gmail.com
- Field visits to markets, boda boda stages and properties
- Social media and printed material for marketing

8.2 Suggested team structure (Proposed)

Role	Main duties
Managing director	Strategy, compliance, final approvals, relationships with regulators
Operations and finance manager	Cash, accounts, reporting and controls
Loan officers	Customer acquisition, assessment, follow-up and collection
Property manager	Owner relations, tenants, maintenance, rent collection
Real estate agent	Listings, viewings, negotiation and sales support
Customer care and administration	Front desk, records, reminders and complaints

8.3 Systems and records (Proposed)

- A customer and loan register, preferably in simple software, updated daily.
- A property register with a file for each owner and each tenancy.
- Standard forms: loan application, loan agreement, receipt book, tenancy agreement, management agreement and sale agreement.
- Secure storage and regular backup of all records.
- A company website with the services, contacts and property listings.

9. Compliance Checklist

Item	Authority	Status
Company registration certificate	Uganda Registration Services Bureau	To confirm
Money lending licence	Uganda Microfinance Regulatory Authority	To confirm
Tax registration (TIN) and filing	Uganda Revenue Authority	To confirm
Trading licence for the premises	Local authority	To confirm
Interest within the legal ceiling	UMRA	Must comply
Customer data protection practice	Personal Data Protection Office	Proposed
KYC and anti-money-laundering procedure	Financial Intelligence Authority guidance	Proposed
Tenancy practice aligned to the Landlord and Tenant Act, 2022	Ministry of Lands, Housing and Urban Development and the courts	Proposed
Agreements reviewed by a lawyer	Legal counsel	Proposed

10. Overall Strengths, Weaknesses, Opportunities and Threats

Strengths	Weaknesses
Clear target market and simple products	New or small brand with limited public track record
Three complementary service lines	Capital limits growth of lending
Fast approval and flexible repayment	Manual processes may slow the 24-hour promise
Good location on the Entebbe Road corridor	Small team stretched across three lines
Opportunities	Threats
Growing demand for small credit and rentals	Interest ceiling and strict regulation
Mobile money and digital record keeping	Competition from banks, mobile lenders and informal agents
Partnerships with boda boda stages, markets and groups	Defaults in an informal-income customer base
Property services for a growing urban population	Land fraud and disputes affecting reputation

11. Growth Roadmap (Proposed)

Period	Focus
First 90 days	Confirm licences and registrations. Standardise forms and agreements. Launch the website and profile. Start a customer register. Set targets and fees
3 to 12 months	Build a base of repeat borrowers. Sign first managed properties. Build a verified property listing book. Introduce mobile money collections. Train staff
12 to 24 months	Expand lending to more groups and markets. Grow the property portfolio. Consider a second outlet. Add online loan applications, a loan calculator and a client portal

12. Information Needed to Finalise This Profile

To turn this from a working profile into a final public document, management should supply:

1. Date of incorporation and company registration number.
2. UMRA money lending licence number and expiry date.
3. Names and short biographies of the director and key staff.
4. Loan amount ranges, tenures, interest rates and fees for each loan product.
5. Number of customers served and total loans disbursed, if available.
6. Property management fee structure and number of properties managed.
7. Real estate commission structure and examples of completed deals.
8. Office hours, branches and any social media pages.
9. Photographs of the office, team and properties, and the official logo file.
10. Testimonials from customers who agree to be quoted.

13. Contact Details

Company	Rolkat Financial Services SMC Ltd

Email	katongolejames122@gmail.com

14. Sources and Notes

- Rolkat Financial Services SMC Ltd business card and owner's brief (company details, services, loan types, target groups, repayment options).
- Uganda Microfinance Regulatory Authority (umra.go.ug): licensing and the 2.8% interest rate for money lenders.
- Legal notice under the Tier 4 Microfinance Institutions and Money Lenders Act, Cap. 61, issued November 2024, as reported by ENS Africa, ICPAU and Daily Monitor: maximum interest of 2.8% per month (33.6% per year), penalties for breach.
- Daily Monitor and Eagle Online: licensing numbers and borrowing statistics for 2023.
- Landlord and Tenant Act, 2022 (Act 9 of 2022), Uganda Legal Information Institute (ulii.org) and ALP East Africa compliance memo.

- Sections marked Proposed are professional recommendations and not statements of Rolkat's current practice. Laws, ceilings and fees can change, so confirm with the regulator or a qualified Ugandan lawyer before relying on them.
