

Software Requirements Specification (SRS)

ROLKAT Financial Services SMC Ltd: Corporate Website

Document version	1.0 (Draft for client approval)
Date	5 October 2026
Prepared by	UI/UX Designer and Web Developer
Prepared for	ROLKAT Financial Services SMC Ltd
Project duration	4 working days

1. Introduction

1.1 Purpose

This document defines what the ROLKAT website must do and how it must perform. It is the agreement between the developer and ROLKAT on what will be delivered in this phase.

1.2 Scope

The website presents ROLKAT's three business lines (loans, property management, and real estate) to the public. It includes an administrator area so ROLKAT staff can update content without a developer.

In scope (Phase 1): Home, About Us, Services, Team and Contact pages; an admin dashboard; a contact form; property listings display; basic SEO; admin training and handover.

Out of scope (Phase 2 candidates): online loan applications with document upload, loan calculator, client portal, online payments, advanced property search, multi-language support.

1.3 Definitions

Term	Meaning
Admin	A ROLKAT staff member with permission to edit website content
Visitor	Any member of the public using the website
CMS	Content Management System (WordPress in this project)
SEO	Search Engine Optimisation
SSL	Security certificate enabling HTTPS

1.4 Stakeholders

Stakeholder	Role
ROLKAT management	Approves requirements, designs and launch
ROLKAT administrator	Maintains website content after launch
Designer/developer	Designs, builds, tests and hands over the site
Visitors	Borrowers, property owners, buyers and tenants

2. Overall Description

2.1 Product perspective

A new, standalone website built on WordPress with a page builder. It is hosted on a web server under ROLKAT's own domain name.

2.2 User classes

User	Needs	Technical skill
Visitor	Understand services, trust the company, make contact, view properties	Low to medium, mostly on mobile phones
Admin	Update text, images, team, listings and contact details easily	Low
Super admin (developer)	Maintain, secure and back up the site	High

2.3 Operating environment

- Browsers: current versions of Chrome, Safari, Firefox and Edge
- Devices: smartphones, tablets, laptops and desktops
- Server: PHP and MySQL hosting with SSL support

2.4 Constraints

- Delivery within 4 days, so content must be supplied by the end of Day 1
- Built on WordPress; no custom-coded CMS
- Text must be in English for Phase 1

2.5 Assumptions and dependencies

- ROLKAT provides logo, brand colours, text, photos, team details and contact details on time
- ROLKAT owns or approves purchase of the domain and hosting
- ROLKAT gives feedback within 2 hours at the approval checkpoints (Day 2 and Day 4)
- Property details and prices are supplied and verified by ROLKAT

3. System Features and Functional Requirements

Priority: **M** = Must have, **S** = Should have, **C** = Could have.

3.1 Public website

ID	Requirement	Priority
FR-01	The site shall contain five pages: Home, About Us, Services, Team, Contact	M
FR-02	A main navigation menu shall appear on every page and collapse into a mobile menu on small screens	M
FR-03	A footer on every page shall show contact details, quick links and social media links	M
FR-04	The logo shall link back to the Home page	M

3.2 Home page

ID	Requirement	Priority
FR-05	Show a hero section with the company tagline and a call-to-action button (e.g. "Contact us")	M
FR-06	Show a summary of the three services with links to the Services page	M
FR-07	Show featured properties (latest listings)	S
FR-08	Show reasons to choose ROLKAT (trust points)	S
FR-09	Show a short testimonials section	C

3.3 About Us page

ID	Requirement	Priority
FR-10	Show company background, mission and vision	M
FR-11	Show core values and registration or licence details if supplied	S

3.4 Services page

ID	Requirement	Priority
FR-12	Present three separate sections: Loans, Property Management and Real Estate	M
FR-13	Each section shall describe the service, who it is for, and how to get started	M
FR-14	Each section shall include a "Contact us" or "Enquire" button	M
FR-15	Display property listings (photo, title, price, location, status: available, sold or rented)	M
FR-16	Visitors shall be able to filter listings by status or type	C

3.5 Team page

ID	Requirement	Priority
FR-17	Show each team member's photo, name, job title and short bio	M
FR-18	Display members in a responsive grid	M

3.6 Contact page

ID	Requirement	Priority
FR-19	Provide a contact form with name, email, phone, subject and message fields	M
FR-20	The form shall validate required fields and show a confirmation after submission	M
FR-21	Each submission shall be emailed to ROLKAT and saved in the admin dashboard	M
FR-22	Show office address, phone numbers, email and working hours	M
FR-23	Show an embedded map of the office location	S
FR-24	Provide a click-to-chat WhatsApp button and click-to-call phone link	M
FR-25	The form shall include spam protection (e.g. CAPTCHA or honeypot)	M

3.7 Admin dashboard

ID	Requirement	Priority
FR-26	Admins shall log in with a username and password at a private login URL	M
FR-27	Admins shall edit page text and images without writing code	M
FR-28	Admins shall add, edit and remove team members	M
FR-29	Admins shall add, edit, mark as sold or rented, and remove property listings	M
FR-30	Admins shall edit services content	M
FR-31	Admins shall edit contact details and footer content	M
FR-32	Admins shall view and export contact form submissions	M
FR-33	Admins shall upload images to a media library	M
FR-34	The system shall support at least two roles: Administrator (full access) and Editor (content only, no settings or plugins)	S
FR-35	Admins shall be able to publish news or blog posts	C
FR-36	Admins shall be able to reset a forgotten password by email	M

4. External Interface Requirements

4.1 User interface

- Professional, trustworthy look suited to a financial company (deep blue or green with a gold or white accent, subject to client approval)
- Consistent fonts, buttons, spacing and card styles on all pages
- Clear call-to-action buttons on every page
- Responsive layouts: mobile first, then tablet and desktop
- Designs approved in Figma before development begins

4.2 Hardware interfaces

None. The site runs on standard web hosting and is used through standard devices.

4.3 Software interfaces

Interface	Purpose
Email (SMTP)	Deliver contact form notifications
Google Maps embed	Show office location
WhatsApp click-to-chat link	Instant messaging with visitors
Google Search Console and Analytics	Search visibility and visitor statistics
Social media links	Facebook, Instagram, LinkedIn and others as supplied

4.4 Communications

All traffic shall use HTTPS. Email delivery shall use authenticated SMTP to avoid messages landing in spam.

5. Non-Functional Requirements

5.1 Performance

- NFR-01: Pages shall load in under 3 seconds on a typical mobile connection
- NFR-02: Images shall be compressed and served in web-friendly formats
- NFR-03: Caching shall be enabled

5.2 Security

- NFR-04: SSL certificate installed and HTTPS enforced
- NFR-05: Strong passwords required for all admin accounts
- NFR-06: Login attempt limiting and a security/firewall plugin enabled
- NFR-07: WordPress core, theme and plugins kept updated
- NFR-08: Admin accounts follow least-privilege roles
- NFR-09: Personal data submitted through forms shall be handled in line with Uganda's Data Protection and Privacy Act, 2019, and a privacy policy shall be published

5.3 Reliability and backup

- NFR-10: Target availability of 99% or higher, depending on hosting provider
- NFR-11: Automated backups at least weekly, with a tested restore process

5.4 Usability

- NFR-12: A new visitor shall be able to find contact details within two clicks from any page
- NFR-13: A non-technical admin shall be able to complete common updates after one 30 to 45 minute training session
- NFR-14: Text shall meet readable contrast and size standards, and images shall have alt text

5.5 Compatibility

- NFR-15: Correct display on the latest two versions of Chrome, Safari, Firefox and Edge, and on Android and iOS phones

5.6 Maintainability and scalability

- NFR-16: Standard, well-supported plugins only, to simplify future support

- NFR-17: The structure shall allow Phase 2 features (loan application, calculator, client portal) to be added without rebuilding the site

5.7 SEO

- NFR-18: Unique page titles and meta descriptions, clear heading structure, descriptive image alt text, a sitemap, and Google Search Console connected

6. Content and Data Requirements

Content	Provided by	Due
Logo, brand colours and fonts	ROLKAT	Before Day 1
Company profile, mission, vision	ROLKAT	Day 1
Service descriptions (loans, property management, real estate)	ROLKAT	Day 1
Team photos, names, titles, bios	ROLKAT	Day 1
Property photos, prices, locations	ROLKAT	Day 2
Contact details, WhatsApp number, working hours	ROLKAT	Day 1
Domain and hosting access	ROLKAT	Before Day 2

7. Project Schedule

Day	Focus	Deliverable
1	Discovery, sitemap, wireframes, style	Approved sitemap and wireframes, Home mockup
2	Full mockups, client approval, WordPress setup	Approved designs, staging site
3	Page build and admin features	All pages built, admin panel working
4	Testing, SEO, training, launch	Live website, training, handover document

8. Acceptance Criteria

The project is accepted when:

1. All five pages are live on the ROLKAT domain over HTTPS
2. All "Must have" requirements (M) pass testing
3. The site displays correctly on mobile, tablet and desktop
4. The contact form delivers an email and stores the submission in the dashboard
5. The administrator can edit text, team members and property listings unaided
6. A backup is confirmed and login details and a how-to guide are handed over
7. ROLKAT management signs off in writing

9. Risks

Risk	Impact	Mitigation
Late content from the client	Delays the schedule	Set a content deadline at the end of Day 1
Slow feedback or approvals	Delays the build	Agree on 2-hour response windows
Scope creep	Misses the 4-day deadline	Move extra requests to Phase 2
Weak admin passwords	Security breach	Enforce strong passwords and login limits
Hosting downtime	Site unavailable	Choose a reliable host and keep backups

10. Phase 2 (Future Enhancements)

- Online loan application form with document upload
- Loan calculator
- Client portal for property management
- Advanced property search and filtering
- Online payments, including mobile money
- Multi-language support

11. Approval

Name	Role	Signature	Date
	ROLKAT representative		
	Designer/developer
