

DYNAMIC WEBSITE DEVELOPMENT PROPOSAL

Prepared for

ROLKAT FINANCIAL SERVICES SMC LTD

Prepared by Mariz Outsourcing Agency (SMC) Ltd
8 September 2026

About Mariz Outsourcing Agency

Mariz Outsourcing Agency is a professional outsourcing and business support firm dedicated to helping organizations optimize operations, reduce costs and improve efficiency. We provide end-to-end human capital solutions, business process outsourcing, technology development and payroll management services to local, regional and international clients.

Rather than functioning as a detached third-party vendor, Mariz operates as an extension of the client's organization, integrating skilled professionals and technical teams into existing workflows and business objectives.

Understanding Your Business Needs

For a financial services organization, a professional website should do more than display company information. It should provide a credible digital front door, make information easy to find, support client enquiries and provide a structure that can evolve as the organization introduces additional online services.

- A professional and credible online presence aligned with Rolkat's brand and business objectives.
- Clear presentation of services, company information and contact channels for prospective and existing clients.
- A responsive experience that works consistently across phones, tablets and desktop computers.
- A manageable platform where authorized staff can update website content without rebuilding the site.
- Secure handling of website data, forms and user access, with room for future integrations and digital services.

Proposed Solution

Mariz proposes to design and develop a dynamic website for Rolkat Financial Services SMC Ltd using the Dynamic Website package. The platform will combine a professional public-facing website with an administrative layer for content and data management.

Core Website Scope

- Professional custom website design and development.
- Responsive design for phone, tablet and desktop.
- Optimized navigation and page structure.
- Contact forms and WhatsApp integration.
- Social media integration and Google Maps integration where required.
- Basic on-page SEO setup.
- Deployment and launch support.

Dynamic Functionality

- Secure administrator dashboard.
- Database integration.
- User login and authentication where required.
- Content management system for authorized updates.
- Forms and data management.
- Custom modules and workflows confirmed during discovery.
- Third-party API integrations where required and technically feasible.
- Scalable architecture for future website features.

Recommended Website Structure

The exact page list will be confirmed with Rolkat during discovery. A recommended starting structure is:

Section	Purpose	Status
Home	Professional introduction, key services and calls to action	Proposed
About Us	Company profile, credibility and organization information	Proposed
Services	Detailed presentation of Rolkat's services	Proposed
Contact	Contact details, enquiry form, WhatsApp and map	Proposed
Dynamic / Admin Features	Content, forms, data and future modules	To confirm

Development Process

Phase	Focus	Outcome
1. Discovery & Planning	Requirements, content, structure, functionality and delivery planning	Confirmed scope and website roadmap
2. Design & Development	UI/UX design and iterative website development	Working website with regular progress reviews
3. Testing & Security	Responsive testing, functional QA and access/security checks	Stable, secure and consistent website
4. Deployment & Launch	Hosting setup, deployment, final checks and handover	Live website and administrator handover
5. Support	Maintenance, updates and technical support	Website that can evolve with Rolkat

Our Core Values

- Reliability consistent delivery you can depend on.
- Quality high standards in design, engineering, testing and support.
- Confidentiality protection of client data and business processes.
- Client Partnership shared success through long-term collaboration.

INVESTMENT & DELIVERY

Investment Summary

The Dynamic Website package is priced from UGX 800,000+. Final pricing depends on the confirmed modules, integrations, content requirements and overall complexity. Hosting and domain fees are charged separately.

Item	Description	Investment
Dynamic Website Development	Custom design, responsive build and dynamic website functionality	UGX 800,000
Additional Modules / Integrations	Custom workflows, APIs or other functionality confirmed in discovery	To be quoted
Domain & Hosting	Domain registration and hosting services	Charged separately
Support	Post-launch updates and technical support, if requested	1 free (Exceeding that may be discussed)

Proposed payment terms: (50% upfront, 50% on completion to be agreed before commencement).

Proposed Timeline

The delivery schedule will be finalized after discovery, receipt of required content and confirmation of any custom modules.

Milestone	Estimated Duration	Deliverable
Discovery & requirements	1 day	Confirmed scope, sitemap and requirements
Design & development	5 days	Website design and functional build
Deployment & handover	1 day	Live website and admin handover

support	1Month	Technical support and maintenance as agreed
---------	--------	---

Important Pricing Note

The package document states that dynamic website pricing depends on modules, integrations and complexity. Accordingly, this proposal treats UGX 800,000+ as the starting package price rather than a final fixed quotation.

Why Partner with Mariz

- Bespoke delivery the website is shaped around Rolkat's business goals rather than a generic one-size-fits-all build.
- Dynamic capability secure administration and content/data management provide flexibility after launch.
- Scalable foundation the package supports future modules and integrations as requirements grow.
- Responsive experience the website is designed for phone, tablet and desktop users.
- Long-term partnership Mariz can provide ongoing technical support and maintenance after launch.

Terms & Next Steps

Terms & Conditions

- This proposal is valid for 30 days from the date of issue.
- Final scope, pricing and timeline will be confirmed in a signed Statement of Work or equivalent agreement.
- All client data and business information will be handled under strict confidentiality.
- Hosting and domain fees are separate from the dynamic website package price.
- Third-party services, paid APIs, premium software, domain registration and hosting are not included unless specifically quoted.
- Additional functionality outside the confirmed scope may require a revised quotation and timeline.

Next Steps

- Review the proposal and confirm the preferred website scope.
- Schedule a discovery session to finalize pages, content, modules and integrations.
- Approve the final quotation and sign the Statement of Work.
- Provide required brand assets, website content and authorized contact details.
- Commence design and development upon agreed payment and project kickoff.

Acceptance

By signing below, both parties acknowledge their intention to proceed with the proposed dynamic website project, subject to the final agreed scope, quotation and terms.
